

Brief Contents

<i>Preface</i>	xi
1. Rethinking the Facility Planning Process.....	1
2. Understanding Your Current Facility	17
3. Defining Strategic Direction and Future Demand.....	37
4. Coordinating Operations Improvement Initiatives and Planned Technology Investments with Facility Planning	49
5. Identifying Facility Needs and Establishing Priorities	67
6. Reaching Consensus on a Long-Range Facility Investment Strategy	93
7. Identifying Specific Projects and Preparing a Phasing and Implementation Plan	107
8. Beginning Detailed Operational and Space Programming.....	117
9. Case Study: Developing a Ten-Year Capital Investment Strategy for a Multihospital System	139
10. Case Study: Planning an Ambulatory Care Facility	151
11. Case Study: Evaluating Emergency Expansion	157
12. Case Study: Developing a Bed Expansion Plan.....	161
13. Case Study: Consolidating Two Acute Care Hospitals.....	169
14. Case Study: Planning a Prototype Community Health Center	175
15. Optimizing Current and Future Flexibility	181
16. Ensuring Success: Optimizing Your Capital Investments.....	187
<i>Index</i>	191
<i>About the Author</i>	201

Detailed Contents

<i>Preface</i>	xi
1. Rethinking the Facility Planning Process.....	1
The Traditional Facility Planning Process: Part of the Problem	1
The New Planning Environment.....	2
Understanding the New Vocabulary.....	9
The Challenge of Predesign Planning	10
The Integrated Predesign Planning Process.....	12
The Predesign Planning Team	14
References.....	16
2. Understanding Your Current Facility	17
Working from the Outside Inward.....	17
All Space Is Not the Same	18
Differentiating Between Net Space and Gross Space.....	25
Bed Allocation and Organization	28
Space Location and Configuration	29
Major Diagnostic and Treatment Spaces.....	33
Space Allocation.....	33
Major Physical Plant and Infrastructure Issues	35
Summary of Baseline Facility Planning Data.....	36
Note	36
Reference	36
3. Defining Strategic Direction and Future Demand.....	37
Understanding Your Market and Patient Population	38
Integrating Facility Planning with Strategic (Market) Planning.....	38
Bridging the Gap: Utilization Analyses That Are Unique to Facility Planning.....	38
High-Bed and Low-Bed Scenarios.....	39
Evaluating Bed Scenarios When There Is a Deficit of Private Rooms....	42
Same-Day-Stay Patients and Observation Beds	42
Location, Location, Location	44

Planning Centers of Excellence	47
Linking the Capacity Assessment to Forecasts of Future Demand	47
The Appropriate Planning Horizon for Facility Planning	48
References	48
4. Coordinating Operations Improvement Initiatives and	
Planned Technology Investments with Facility Planning	49
Institutionwide Operations Improvement Initiatives	49
Common Institutionwide Systems and Related Technology	50
Clinical Service Line Operations Improvement Initiatives	51
Advances in Information and Communications Technology	52
Considering New Operational and Facility Configuration Models	53
References	65
5. Identifying Facility Needs and Establishing Priorities	67
Understanding the Space Planning Process	67
Tools and Techniques	68
Evaluating Facility Capacity	73
Understanding Your Outpatient Population	80
Benchmarking Your Current Functional Layout Against Ten Facility	
Configuration Principles	80
Summarizing Space Requirements	83
Summarizing Key Facility Issues and Establishing Priorities	83
Using Matrices	85
Specific Issues Associated with Eliminating Surplus Capacity	87
References	91
6. Reaching Consensus on a Long-Range Facility Investment Strategy	93
Why Develop a Long-Range Facility Investment Strategy?	94
Common Strategies Developed by Healthcare Organizations Today	94
What About Planning Centers of Excellence?	104
The Challenge of Private Donors	104
Is “Doing Nothing” a Strategy?	105
Future Facility Configuration Drawings	105
Reference	105
7. Identifying Specific Projects and Preparing a Phasing	
and Implementation Plan	107
Developing a Rational Approach	107
Grouping of Projects by Priority	109
Developing Preliminary Project Cost Estimates	112
Differentiating Between Base Construction Costs and Project Costs	113

Preparing Realistic Cost Estimates: A Catch-22	114
Planning a New Facility from the Ground Up.....	115
References.....	115
8. Beginning Detailed Operational and Space Programming.....	117
Defining Operational and Space Programming	117
Components of the Operational Program	118
Example: Operational Program for an Endoscopy Suite	118
Preparing the Space Program.....	125
Organizing the Space Program	125
Common Spaces	128
Key Space Drivers	128
About Building Codes.....	130
Developing Supplementary Conceptual Diagrams	130
Ensuring an Effective Planning Process	131
Programming Inpatient Nursing Units.....	134
Relationship of the Operational and Space Program to Subsequent Documentation.....	134
Ten Common Operational and Space Programming Pitfalls.....	136
References.....	138
9. Case Study: Developing a Ten-Year Capital Investment Strategy for a Multihospital System	139
Capital Investment Strategy (Facility Master Plan) 2015	140
The Planning Process	142
Major Facility Assets and Liabilities by Campus.....	142
Market Dynamics and Future Bed Need	144
Key Facility Priorities	144
Long-Range Facility Development Scenarios.....	146
Ten-Year Capital Investment Strategy for Southern Health System.....	147
Detailed Project Phasing and Implementation Plan.....	150
10. Case Study: Planning an Ambulatory Care Facility	151
Planning Approach	152
Comparison of Facility Planning Assumptions and Space Need	152
Conclusion	153
11. Case Study: Evaluating Emergency Expansion	157
Planning Approach	158
Effect of Treatment Room Turnaround Time on Emergency Department Space and Project Costs	159
Conclusion	159

12. Case Study: Developing a Bed Expansion Plan.....	161
Planning Approach	162
Analysis.....	164
Conclusion	166
13. Case Study: Consolidating Two Acute Care Hospitals.....	169
Key Planning Issues.....	169
Proposed Facility Consolidation Plan.....	170
Comparison of Existing and New Space.....	170
14. Case Study: Planning a Prototype Community Health Center	175
The Challenge.....	175
Facility Planning Principles	176
Identifying Generic Spaces	176
Determining Key Space Drivers	176
Organizing Space into Functional Categories.....	178
Future Expansion.....	179
Conclusion	179
15. Optimizing Current and Future Flexibility	181
Why Is Flexibility Important?	181
Different Ways of Achieving Flexibility	182
Developing Space Standards and Planning Generic Spaces.....	184
Redesigning the Healthcare Campus.....	185
Reference	186
16. Ensuring Success: Optimizing Your Capital Investments.....	187
Deploy a Formal Predesign Planning Process	187
Rethink Current Organizational and Operational Models and Use of Technology.....	188
Separate Perception from Reality.....	188
Develop Realistic Return-on-Investment Assumptions.....	188
Use Industry Benchmarks, Rules of Thumb, and Best Practices for Validation.....	188
Focus on the Customer	189
Optimize Current and Future Flexibility.....	189
Reference	189
