Patterns: as datasets, 169; definition of, 54; identification of, 54–55

Payment delivery models/systems, 22, 23; alternative, 25–26; episode-based, 23; prospective, 25; value-based, 25–26, 154

PDCA (Plan, Do, Check, Act) cycle, 204–207, 225–227, 268

Pediatrics, 3–4; goal setting in, 115, 117–118

Percentiles, 184, 185

Performance data. See Data

Performance gap improvement. See also Improvement design; Improvement implementation: practice exercise in, 301–307

Performance management, definition of, 8, 10

Performance management cycle, 151

Performance management measures: classification of, 157–158; purpose of, 150; quality continuum and, 160–162

Performance measurement/measures, 149–165; with aggregated data, 192–196; externally driven, 152, 154–156; internally driven, 152–154; leveraging of, 152; organizational assessment of, 298; purpose of, 91–93; for quality improvement, 13; selection of, 151–160; transparency in reporting of, 27; types of, 155–160; with unaggregated data, 191–196

Performance measurement system, 218

Personal control, patients’ desire for, 139–140

Personality types, 131, 134

Personnel expenses, cost-reduction strategies for, 43–44

Petzinger, Thomas, Jr., 137–141

Pharmacists, approach to healthcare quality, 5

Pharmacogenomics, 39

Pharmacotherapeutics, 39

Physician assistants, shortage of, 34

Physician managers, approach to healthcare quality, 5

Physicians: position in healthcare hierarchy, 129–130; shortage of, 34; teamwork definition of, 130

Pillars of performance, 158–160

Pilot projects, 54
Plan, Do, Check, Act (PDCA) cycle, 204–207, 225–227, 268
Pneumonia, 121–122
Poka-yoke method, 251
Policy. See Healthcare policy
Political models, of organizations, 59
Population-based statistics, 169
Population data, sources of, 162
Population determinants, of health behavior, 74, 75, 76
Power, mental models of, 129
Practice acts, 17
Preadmission process, in ambulatory surgery units, 86–88
Predictive analytics: applications of, 179–180; definition of, 168, 179
Preemptive medicine, 39
Prenatal care, 93–96, 120, 157
Prescriptive analytics, definition of, 168
Press Ganey, 154
Prevention/preventive care: primary, 89; as process measure, 157; secondary, 89; tertiary, 89
Primary care, medical homes concept of, 23
Prioritization: of improvement opportunities, 399; of problems, 240–241, 300
Private sector: accreditation from, 19; healthcare quality policies of, 17–18, 19
Proactive risk assessment, 271–273
Problem(s): context of, 90–91; identification of, 86–88; prioritization of, 240–241
Problem solving: common ground for, 88–89; effective, 90; evidence-based method of, 203–204; repair service behavior approach to, 110; scientific method of, 203–204
Process(es): definition of, 236; design of, 151–152
Process behavior charts, 189–191, 243, 245
Process capability, 186–188
Process flowcharts, 236–237, 247, 251
Process improvement, human resources needs as, 73
Process measures: definition of, 6; as performance management measures, 157; as proxy measures for outcomes, 6
Process of care, definition of, 6
Process performance, 186–191
Process requirements, 186, 187
Product lines, 85–86
Product standardization, 39, 41
Professional judgment, 204
Project charters, 230–232, 246–247
Project teams, 128
Prospective payment system, 25
Public disclosure. See Transparency
Public health: healthcare quality policies in, 17–18; outcome measures in, 18
Public Health Foundation, website of, 15
Public health system, 35, 36
Public Health Voluntary Accreditation Board, 26
Public policies, for healthcare quality, 17–18, 19, 20–26; definition of, 20; for knowledge acquisition, 21, 24; for quality oversight, 20–26; for transparency, 24
Purpose, 84–96; appropriate level of, 95; clarification of, 90–91, 103; common goals and, 88–89; corollaries to, 97, 98, 120–121; definition of, 83–84; of goals, 90–91, 120–121; identification of, 91–95; of improvement projects, 230; innovations and, 89–90; mental models of, 90; of performance measures and reporting, 91–93; problem identification and, 86–88; relationship to outcomes, 84–85; relationship to vision, 96
Purpose principle, 90–96; definition of, 90; examples of, 91–95

Quality, of healthcare: definition of, 5, 253; dimensions of, 153–154; Donabedian model of, 5–6, 18, 66, 84, 157; interpersonal components of, 5–6; key components of, 5, 254; managers’ influence on, 287–288; organizational, 4; relationship to patient safety, 253–254; technical components, 5–6; terminology of, 7–9

Quality assurance (QA), definition of, 7, 10

Quality Check website, 27

Quality continuum: of information technology, 13; performance management measures and, 160–162; relationship to goals, 108

Quality control (QC): common activities in, 7; definition of, 7, 10

Quality departments, mission of, 83

Quality Improvement Organizations (QIOs), 24

Quality improvement (QI): definition of, 7–8, 10; differentiated from total quality, 8, 10; financial incentives for, 28; as teamwork process, 12

Quality improvement tools, practice exercise with, 313–318

Quality indicators: definition of, 150; in nursing, 154

Quality Innovation Networks, 24

Quality management: as continuum, 12–14; definition of, 9; fundamentals of, 3–16; priorities in, 13

Quality measures (metrics), definition of, 150

Quality outcome, responsibility for, 4–5

Quality oversight organizations, 17–32

Quantitative data, definition of, 170

Quartiles, 185

Queuing theory, 251

Radiation exposure, regulation of, 17–18

Radiology services, performance measures for, 153–154

Ramsey, Dave, 71

Random variation, 189, 191

Range, in datasets, 183
