BRIEF CONTENTS

Preface ............................................................................................................. xiii

Chapter 1. Approaching Value-Based Healthcare ........................................... 1
Chapter 2. Clinical Innovations for Value-Based Care ................................. 21
Chapter 3. Value and Payment Reform .......................................................... 41
Chapter 4. Accountable Care Organizations and Value ............................... 53
Chapter 5. Clinical Integration ....................................................................... 71
Chapter 6. Population Health ......................................................................... 103
Chapter 7. Health Information Technology and Value ................................. 139
Chapter 8. Quality Improvement and Value-Driven Care .............................. 165
Chapter 9. Tools for Improving Quality and Safety ...................................... 185
Chapter 10. Accreditation and High Reliability ............................................ 207
Chapter 11. Cost Structure and Sustainable Value in Healthcare .............. 229
Chapter 12. The Potential for Delivering Value: Historical and Economic Perspectives ......................................................................................... 255
Chapter 13. Ethics, Compliance, and Regulations Enabling Value-Based Care .............................................................................................................. 291

Appendix I. Structure of a Pay-for-Performance Program ............................. 313
Appendix II. Performance Standards for Accountable Care Organizations .... 323
Appendix III. Patient Engagement ................................................................. 335

This is an unedited proof.

Appendix IV. Informational Technology, Electronic Health Records, and Meaningful Use..........................341

Appendix V. Key Elements of an Information Technology System for Healthcare ..................................................357
DETAILED CONTENTS

Preface .................................................................................................................. xiii

Chapter 1. Approaching Value-Based Healthcare ........................................ 1
  Learning Objectives ................................................................................. 1
  Introduction ......................................................................................... 1
  Value in Healthcare ........................................................................... 4
  Legislative Response to the Need for Value-Based Healthcare .......... 6
  The Implications of Value-Based Competition for Providers and Payers 9
  The Implications of Value-Based Competition for Suppliers ............. 12
  The Implications of Value-Based Competition for Consumers .......... 14
  Leadership Skills Needed for the Evolution to Value-Based Care: Change Management 14
  Summary ......................................................................................... 17
  Notes .............................................................................................. 18
  Discussion Questions ........................................................................ 19

Chapter 2. Clinical Innovations for Value-Based Care .................................. 21
  Learning Objectives ........................................................................... 21
  Coordination of Care ......................................................................... 22
  Readmission Prevention .................................................................... 25
  Palliative Care .................................................................................. 28
  Care Transitions ............................................................................... 31
  Patient-Centered Medical Homes and Patient Outreach .................. 34
  A Proposed Model for Care Delivery .................................................. 36
  Summary .......................................................................................... 37
  Notes ............................................................................................... 37
  Discussion Questions ........................................................................ 38

This is an unedited proof.

### Chapter 3. Value and Payment Reform
- Learning Objectives ............................................. 41
- Pay for Performance ................................................. 42
- Risk-Based Contracting ............................................ 47
- Summary ................................................................. 50
- Note ........................................................................ 50
- Discussion Questions ................................................. 51

### Chapter 4. Accountable Care Organizations and Value
- Learning Objectives .................................................. 53
- Key Features of an ACO .............................................. 54
- Operational Issues in Running a Successful ACO .......... 58
- Success and Failure of ACOs: A Scorecard .................. 64
- Summary ................................................................. 67
- Discussion Questions ................................................. 68

### Chapter 5. Clinical Integration
- Learning Objectives .................................................. 71
- Clinical Integration and Clinical Alignment ................. 72
- The Need for Clinical Integration ............................... 73
- The Spectrum of Clinical Integration ......................... 75
- Requirements for Clinical Integration ......................... 79
- Options for Clinical Integration .................................. 80
- Experiences with Clinical Integration Thus Far ............ 84
- Alignment Models ..................................................... 87
- Value-Based Care and Interprofessional Collaboration ... 95
- Summary ................................................................. 98
- Notes ......................................................................... 99
- Discussion Questions ................................................. 100

### Chapter 6. Population Health
- Learning Objectives .................................................. 103
- Historical Perspective: Public Health as a Precursor to Population Health ..................................... 104
- Population Health: A Modern Perspective .................. 105
- Competencies and Interventions for Delivering Population Health ...................................................... 108
- The Multiple Determinants of Population Health ........ 109
- Components of a Population Health Program .............. 112
- The Finances of Population Health: Accepting and Managing the Risk ............................................ 118

**Chapter 10.** Accreditation and High Reliability .......................... 207  
Learning Objectives .................................................. 207  
Accreditation ............................................................ 207  
High Reliability Organizations ................................... 215  
Summary ................................................................. 224  
Notes ..................................................................... 225  
Discussion Questions .................................................. 225  

**Chapter 11.** Cost Structure and Sustainable Value in Healthcare .... 229  
Learning Objectives .................................................. 229  
Understanding Cost .................................................. 230  
Cost Allocation .......................................................... 232  
Project Management .................................................. 236  
Streamlining the Cost Structure ...................................... 245  
Summary ................................................................. 251  
Note ..................................................................... 252  
Discussion Questions .................................................. 252  

**Chapter 12.** The Potential for Delivering Value: Historical and  
Economic Perspectives ................................................. 255  
Learning Objectives .................................................. 255  
Historical Perspective .................................................. 256  
The Economic Ramifications of Value Delivery  
in Healthcare ............................................................. 258  
Financing Healthcare: Sources of Funding and  
Implications for Value Delivery ..................................... 262  
Note ..................................................................... 284  
Notes ..................................................................... 285  
Discussion Questions .................................................. 287  

**Chapter 13.** Ethics, Compliance, and Regulations Enabling  
Value-Based Care ...................................................... 291  
Learning Objectives .................................................. 291  
The Ethical Basis for Value-Based Healthcare .................. 292  
Ethical Components of Value-Based Care ...................... 296  
Patient Autonomy ....................................................... 297  
Ethical Considerations for Managed Care ...................... 300  
Regulatory Support For Value-Based Care ...................... 302  
Summary ................................................................. 310  
Notes ..................................................................... 311  
Discussion Questions .................................................. 311
Appendix I. Structure of a Pay-for-Performance Program ..........313
Clinical Process of Care .............................................313
Patient Satisfaction ..................................................317
Outcomes ..................................................................317
Efficiency ..................................................................319
Hospital-Acquired Conditions ........................................319
Looking Ahead ..........................................................321
Note .........................................................................321

Appendix II. Performance Standards for Accountable Care Organizations ..................................................323
Quality Performance Standards for ACOs ..................323
Quality Performance Scoring for Accountable Care Organizations ........................................................331
Financial Reconciliation of Quality Metrics ..................333

Appendix III. Patient Engagement ...............................................335
The Importance of Patient Engagement .......................335
Obstacles to Patient Engagement ..................................336
Emerging Tools and Technologies for Patient Engagement ..........................................................336
Limits of Patient Engagement .......................................339
Moving Forward with Patient Engagement ....................339

Appendix IV. Informational Technology, Electronic Health Records, and Meaningful Use ..................341
Meaningful Use ..........................................................341
Health Information Exchange .......................................350
Semantic Interoperability ............................................351
Cybersecurity, Risk Assessment, and Protected Health Information .....................................................352
Progress Report Card on Health Information Technology ..........................................................353

Appendix V. Key Elements of an Information Technology System for Healthcare ..................................357
Administrative Systems ...............................................357
Managed Care Activities .............................................357
IT Infrastructure .......................................................361

Appendix VI. Sources of Error Contributing to Reduced Quality and Value .............................................365
Conditions That Lead to Error ........................................... 366
