

BRIEF CONTENTS

<i>Preface</i>	xvii
Chapter 1. Health Systems Informatics: A Transformational Science ..	1
<i>Gordon D. Brown</i>	
Chapter 2. Knowledge-based Decision Making	21
<i>Gordon D. Brown, Kalyan S. Pasupathy, and Mihail Popescu</i>	
Chapter 3. Health Professions, Patients, and Decisions	49
<i>Gordon D. Brown</i>	
Chapter 4. The Coming of the Corporation: Transforming Clinical Work Processes.....	73
<i>Gordon D. Brown</i>	
Chapter 5. Predictive Analytics in Knowledge Management	97
<i>Gordon D. Brown, Kalyan S. Pasupathy, and Mihail Popescu</i>	
Chapter 6. Clinical Decision Support Systems in Medicine	121
<i>Pavithra I. Dissanayake and Karl M. Kochendorfer</i>	
Chapter 7. Nursing Informatics	149
<i>Carol G. Klingbeil, Pei-Yun Tsai, and Timothy B. Patrick</i>	
Chapter 8. E-health and Consumer Health Informatics.....	169
<i>George Demiris and Blaine Reeder</i>	
Chapter 9. Precision Medicine	193
<i>Timothy B. Patrick and Aurash A. Mohaimani</i>	
Chapter 10. Information Systems as Integrative Technology for Population Health.....	209
<i>Julie M. Kapp</i>	
Chapter 11. Global Health Systems Informatics	229
<i>Gordon D. Brown</i>	

Chapter 12.	Controlled Terminology and the Representation of Data and Information.....	253
	<i>Timothy B. Patrick and Carmelo Gaudio</i>	
Chapter 13.	Information Management Strategy	271
	<i>James D. Buntrock</i>	
Chapter 14.	The Role of People and Information in Delivering Patient-Centered Care	293
	<i>Naresh Khatri</i>	
Chapter 15.	Valuation and Financing of Healthcare Services and Information Technology Infrastructure.....	317
	<i>Kalyan S. Pasupathy and Gordon D. Brown</i>	
Chapter 16.	Data and Information Security in the Healthcare Enterprise	343
	<i>Dixie B. Baker and Timothy B. Patrick</i>	
<i>Appendix: Professional Societies, Accrediting Agencies, and Additional Insights in Health Informatics</i>		
	<i>Timothy B. Patrick</i>	373
	Professional Societies	373
	Accreditation and Other Organizations	375
	Additional Insights	377
	References	377
	<i>Glossary</i>	379
	<i>Index.....</i>	385
	<i>About the Authors/Editors</i>	387
	<i>About the Contributors</i>	389

DETAILED CONTENTS

<i>Preface</i>	xvii
Chapter 1. Health Systems Informatics: A Transformational Science ...	1
<i>Gordon D. Brown</i>	
Learning Objectives	1
Key Concepts	1
Introduction	1
Complex Adaptive Systems in Healthcare	2
Bioinformatics	4
Medical Informatics.....	5
Public Health Informatics.....	7
Health Systems Informatics and Transformational Change.....	8
Management Information Science	12
Conclusion.....	13
Chapter Discussion Questions	14
Case Study: Electronic Health Record: Where Does the System End?	14
Additional Resources.....	17
References.....	18
Chapter 2. Knowledge-based Decision Making	21
<i>Gordon D. Brown, Kalyan S. Pasupathy, and Mihail Popescu</i>	
Learning Objectives	21
Key Concepts	21
Introduction	21
Definition and Use of Knowledge in Decision Making.....	22
Knowledge Organizations	24
Clinical Knowledge Management	25
Patient-Centered Care.....	33
Transformational Strategy.....	36
Knowledge Socialization.....	37
Knowledge Brokering.....	38

	Conclusion.....	40
	Chapter Discussion Questions	41
	Case Study: Knowledge Management in Accountable Care Organizations	41
	Additional Resources.....	44
	References.....	44
Chapter 3.	Health Professions, Patients, and Decisions	49
	<i>Gordon D. Brown</i>	
	Learning Objectives	49
	Key Concepts	49
	Introduction	49
	Transformation of the Clinical Function	50
	The Science of Clinical Decision Making	54
	Conclusion.....	65
	Chapter Discussion Questions	66
	Case Study: Redesigning Futures: The First Ever Engineering-driven College of Medicine	66
	Additional Resources.....	69
	References.....	69
Chapter 4.	The Coming of the Corporation: Transforming Clinical Work Processes.....	73
	<i>Gordon D. Brown</i>	
	Learning Objectives	73
	Key Concepts	37
	Introduction	73
	Traditional Corporate Structures as the Logic for Clinical Information Systems	75
	Standardization of Clinical Work Processes	78
	Integrated Systems Perspectives	82
	Conclusion.....	90
	Chapter Discussion Questions	90
	Case Study: Not All Innovation Is Created Equal in the Transition to Value-based Care	91
	Additional Resources.....	93
	References.....	93
Chapter 5.	Predictive Analytics in Knowledge Management	97
	<i>Gordon D. Brown, Kalyan S. Pasupathy, and Mihail Popescu</i>	
	Learning Objectives	97

Key Concepts	97
Introduction	97
Data Mining and Analytics	98
Database Types and Their Impact on Data Mining	101
Data-Mining Methods.....	104
Dynamic Systems Modeling.....	106
Conclusion.....	113
Chapter Discussion Questions	114
Case Study: Analytics for Disease Management and Wellness	115
References.....	118
Chapter 6. Clinical Decision Support Systems in Medicine	121
<i>Pavithra I. Dissanayake and Karl M. Kochendorfer</i>	
Learning Objectives	121
Key Concepts	121
Introduction	121
Definition	122
History and National Policies	122
CDSS Types.....	124
Effective Characteristics.....	127
Design and Implementation	129
Challenges and Barriers	131
Clinical Domain Examples.....	134
Conclusion.....	136
Chapter Discussion Questions	137
Case Study: Effective CDSS Implementation	137
Additional Resources.....	140
References.....	140
Chapter 7. Nursing Informatics	149
<i>Carol G. Klingbeil, Pei-Yun Tsai, and Timothy B. Patrick</i>	
Learning Objectives	149
Key Concepts	149
Introduction	149
Informatics, Nursing, and the Transformation of Clinical Care.....	151
Roles of Nurses in Informatics.....	152
Nursing Work and Information System Applications	153
Quality and Safety of Care.....	156
Consumer Engagement.....	159

	Nursing Education and Research	162
	Research and Practice	162
	Conclusion.....	163
	Chapter Discussion Questions	163
	Case Study: A Question of Evidence	164
	Additional Resources.....	166
	References.....	166
Chapter 8.	E-health and Consumer Health Informatics.....	169
	<i>George Demiris and Blaine Reeder</i>	
	Learning Objectives	169
	Key Concepts	169
	Introduction	169
	Review of Patient-Centered Systems	171
	Personal Health Records	172
	Social Media and Consumer Health Informatics	173
	Challenges in E-health Applications.....	177
	Success Factors for E-health	179
	Conclusion.....	183
	Case Study: Blue River Home Care	184
	Chapter Discussion Questions	184
	References.....	187
Chapter 9.	Precision Medicine	193
	<i>Timothy B. Patrick and Aurash A. Mohaimani</i>	
	Learning Objectives	193
	Key Concepts	193
	Introduction	193
	Precision Medicine and Genomic Science	194
	Precision Medicine Initiatives	195
	Precision Medicine and Popular Culture	196
	Precision Medicine and Big Data	196
	Precision Medicine and Scientific Reproducibility	199
	Conclusion.....	202
	Chapter Discussion Questions	202
	Case Study: Whose Body?.....	202
	Note	204
	Additional Resources.....	205
	References.....	205

Chapter 10.	Information Systems as Integrative Technology for Population Health.....	209
	<i>Julie M. Kapp</i>	
	Learning Objectives	209
	Key Concepts	209
	Introduction	209
	Status of Population Health in the United States	210
	Population Health Provisions in the Affordable Care Act	211
	Difference Between Public Health and Population Health	213
	Population Health Management in the United States	214
	Population Health as a System.....	217
	Integrating Healthcare and Public Health Through Systems Design	222
	Conclusion.....	223
	Chapter Discussion Questions	224
	Case Study: Pemiscot County	224
	Additional Resources.....	225
	References.....	225
Chapter 11.	Global Health Systems Informatics	229
	<i>Gordon D. Brown</i>	
	Learning Objectives	229
	Key Concepts	229
	Introduction	229
	Comparative Analysis of Health Systems Informatics: Design and Function	230
	Restructuring Health Systems According to the Logic of Health Systems Informatics	234
	Knowledge-Based Health Systems Design.....	238
	Development of Global Health Systems: Collaborative Systems	239
	Global Health Policy and Population Health	245
	Conclusion.....	246
	Chapter Discussion Questions	247
	Case Study: Envisioning a Global Community	248
	Additional Resources.....	249
	References.....	250

Chapter 12.	Controlled Terminology and the Representation of Data and Information.....	253
	<i>Timothy B. Patrick and Carmelo Gaudio</i>	
	Learning Objectives	253
	Key Concepts	253
	Introduction	254
	Health Informatics and Representational Science	254
	Surrogate Representations and Controlled Terminology Components	255
	Two Basic Uses of Controlled Terminology.....	259
	Metadata and Metadata Schemata.....	260
	Common Data Elements and CDE Repositories.....	262
	Interoperability and the Terminology Problem	263
	Terminology Mapping.....	264
	Quality Measurement, Variation, and Coding	265
	Conclusion.....	266
	Chapter Discussion Questions	266
	Case Study: A Problem of Display Codes.....	267
	Additional Resource	268
	References.....	268
Chapter 13.	Information Management Strategy	271
	<i>James D. Buntrock</i>	
	Learning Objectives	271
	Key Concepts	271
	Introduction	271
	Data as Assets.....	272
	Steps in Strategy Development	275
	Data Movement	282
	Data Representation.....	283
	Data Accessibility	284
	Other Considerations	285
	Conclusion.....	288
	Chapter Discussion Questions	289
	Case Study: Guiding a Merger.....	289
	Additional Resources.....	290
	References.....	290

Chapter 14.	The Role of People and Information in Delivering Patient-Centered Care	293
	<i>Naresh Khatri</i>	
	Learning Objectives	293
	Key Concepts	293
	Introduction	293
	Major Features of the Health Services	
	Delivery Process	294
	Proactive Work Behaviors in Health Services Delivery	
	Process	295
	HRM Capabilities	296
	HIT Capabilities	301
	Is a Homegrown System Better Than an Outsourced System?.....	306
	Conclusion.....	306
	Chapter Discussion Questions	307
	Case Study: University Hospital.....	308
	Additional Resources.....	310
	References.....	310
Chapter 15.	Valuation and Financing of Healthcare Services and Information Technology Infrastructure.....	317
	<i>Kalyan S. Pasupathy and Gordon D. Brown</i>	
	Learning Objectives	317
	Key Concepts	317
	Introduction	317
	Financing Models	318
	Lack of Coordination and Information Sharing	322
	Redesigning Structure and Financing	323
	Valuation of Healthcare Services.....	328
	Valuation of IT Infrastructure.....	330
	Conclusion.....	337
	Chapter Discussion Questions	338
	Case Study: Med City's Diabetes Management	
	Care Group	338
	Additional Resources.....	340
	References.....	340

Chapter 16. Data and Information Security in the Healthcare Enterprise	343
<i>Dixie B. Baker and Timothy B. Patrick</i>	
Learning Objectives	343
Key Concepts	343
Introduction	344
Health and Financial Risks Related to Data and Information Security	344
Resources for Tracking Breaches.....	345
Technical Issues in the Protection of Data and Information	346
Fair Information Practices	349
Security Implementation in EHR Technology	350
New and Developing Opportunities and Challenges	357
Authentication Redux	361
Conclusion.....	363
Chapter Discussion Questions	364
Case Study: Heinz Children’s Health	365
Additional Resources.....	369
References.....	369
 <i>Appendix: Professional Societies, Accrediting Agencies, and Additional Insights in Health Informatics.....</i>	 373
<i>Timothy B. Patrick</i>	
Professional Societies	373
Accreditation and Other Organizations.....	375
Additional Insights	377
References	377
<i>Glossary</i>	<i>379</i>
<i>Index.....</i>	<i>385</i>
<i>About the Authors/Editors</i>	<i>387</i>
<i>About the Contributors</i>	<i>389</i>
